TO WHOM IT MAY CONCERN

We have recently instructed Life Solutions to install a Reverse Osmosis (RO) drinking water dispenser in our office.

We used to provide our staff bottled water which was not cost effective and took up a lot of storage space. Life Solutions introduced us their drinking water system which is able to filter contaminants out of tap water. This provides us a cost-effective alternative with clean and healthy water.

After using this service for months, we are satisfied with both the quality of water and the maintenance service Life Solutions has accorded to us. We would like to recommend Life Solutions and their services to any companies who are seeking to supply good quality water to their staffs with economic and affordable costs.

Yours faithfully,
For and On Behalf Of
